

**WHAT
DO YOU
HAVE
TO LOSE?**

Break-in. Hack-in. Fire. Theft. It only has to happen to your organization once to appreciate the value of appropriate security to prevent it. Knowing exactly how to protect the people, equipment and information unique to your business requires expertise. To get that expertise, Northwest businesses partner with Protec.

As a full-service security systems integrator, Protec designs, installs and maintains comprehensive security systems for schools, government offices, businesses, and manufacturing facilities throughout the Northwest. Whether you need a stand-alone intrusion prevention system or a complex security solution that grows with you, Protec has the competence and experience to install the safeguards to protect your enterprise. And, we serve you better because our security experts are right here, familiar with all internal and external threats.

Answer the question: 'What do we have to lose?' Then call Protec.

PROTECTM
Security, Fire and Video Systems

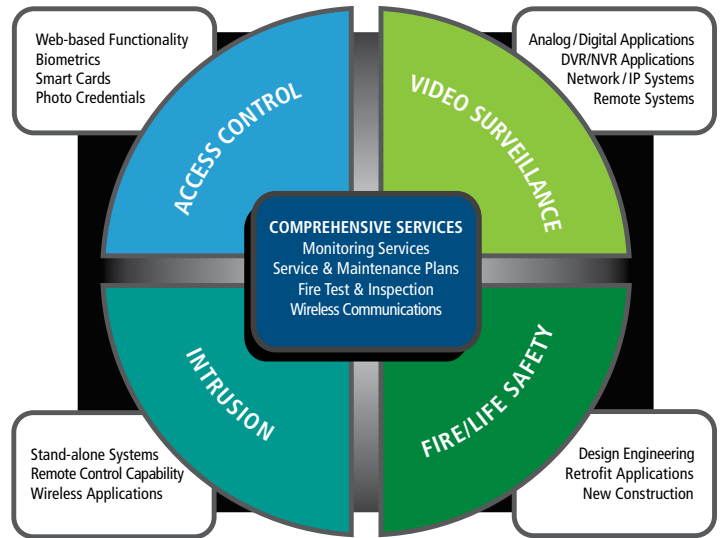

Let Protec experts keep you safe while you focus on growing your business.

PROTEC PROCESS

Every company's security needs are unique. The Protec process allows us to design appropriate solutions for each client's situation. Leading our response is a project manager who ensures that the installation schedule is executed according to the plan you've approved.

- **Needs assessment:** We initiate each project with a dialogue with your key team members to ensure that we completely understand what's unique about your situation and anticipate your growth and security objectives.
- **Technology application/plan approach:** With over 200 years of combined experience and deep technology expertise, we will educate you on the various security options, provide advice where needed and formulate expert recommendations for a customized plan to fit your needs.
- **Customer validation & solution changes:** Since a good design begins with listening to our customers, you will be there every step of the way. The Protec team will walk you through the initial design, plan and budget. We will get your final validation, confirmation and any changes to arrive at the appropriate solution.
- **Installation & project management:** Our expert technical team will arrive on-site to install and configure your comprehensive security system. Our project manager will supervise the setup to ensure installation is done properly and according to schedule.
- **Customer training:** Whether you need customized software, system manuals or classroom training, we train your employees to ensure they have a thorough understanding of how to operate your new security system.
- **Monitoring & comprehensive service plans:** Protec provides a wide range of monitoring, communications, service, and maintenance plans based on the size and complexity of your solution, helping to minimize downtime. Our trained and certified technicians are on call 24/7 to support your needs.

ABOUT PROTEC

For 25 years, PROTEC has provided full-service security systems to Pacific Northwest businesses. Our cumulative experience designing and servicing access control, CCTV, security alarm systems and fire/life safety systems is vast. Protec is large enough to provide the best-in-class services, but small enough to partner with each customer individually to serve unique needs.

Our clients span a wide range of industries and disciplines:

- Education
- Government
- Property Management
- Technology
- Financial
- Distribution/Warehouse/Transportation

Partner with Protec today. What do you have to lose?
